Policy Questions

- ▶ Should the state-level ILHIE utilize a unique patient identifier for the purpose of matching patient records?
 - ▶ To what extent should the state-level ILHIE impose upon providers connected to the state-level ILHIE standards for the degree of patient matching accuracy achieved in provider systems?
 - ▶ Should patients be able to access their data transmitted through the ILHIE to check for inaccuracies?
 - ▶ If inaccuracies are apparent, should the ILHIE address patient requests to correct data or refer such requests to the patient's healthcare providers?
-
